

Who are our >1000 Members ?

As per June 1, 2011, more than **1000 Members** are enlisted at UreaKnowHow.com working in 210 different urea plants. This means **90% of all the urea plants worldwide outside China** are part of the network of UreaKnowHow.com. UreaKnowHow.com has become the largest virtual network in the urea industry and although we consider 80% as a milestone we are still growing as is illustrated in Figure 1.

Figure 1: Number of Members in time

Please find below more information about the background of our Members.

Figure 2 shows the location of the urea plants of our Members. Our members are more or less equally divided over all continents. About 40% of our Members are from Asia, China and Oceania and 20% from the Americas and Caribbean. Further about 25% are from Middle East and Africa and 15% from Europe, Russia and FSU countries.

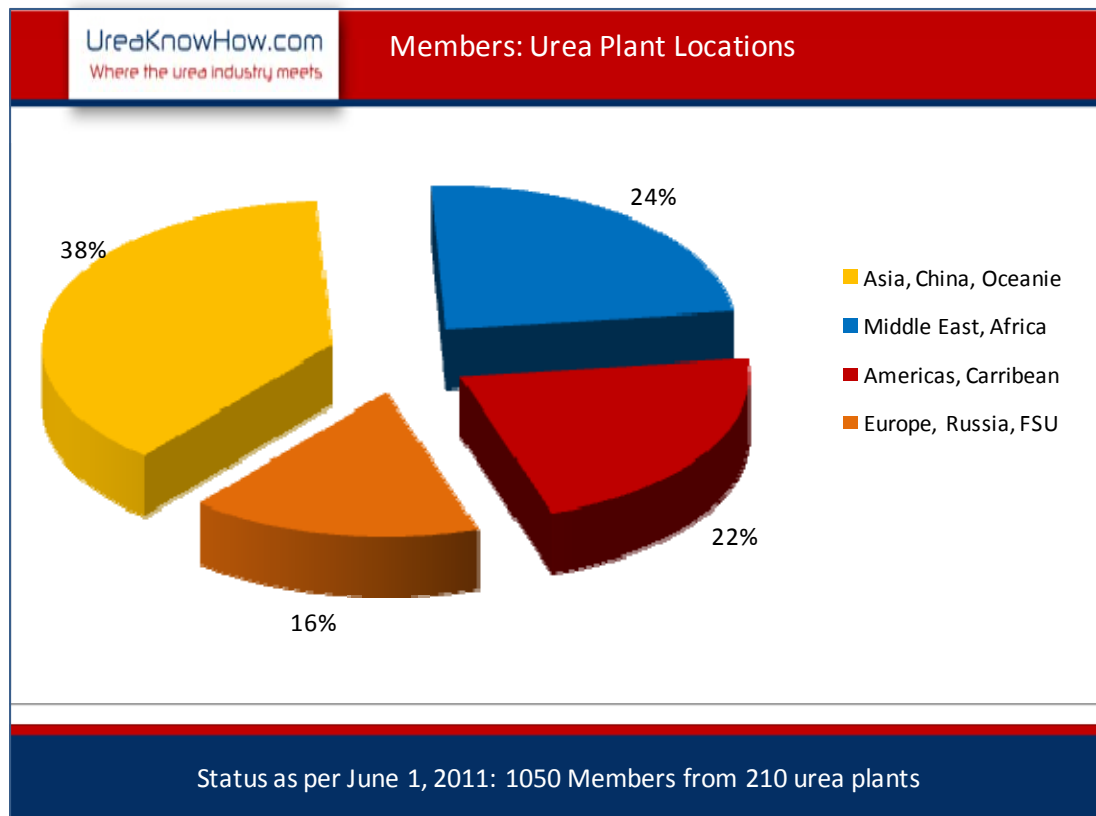

Figure 2: The location of our Members Urea Plants

Figure 3 shows what the synthesis urea technology is of the urea plants of our Members.

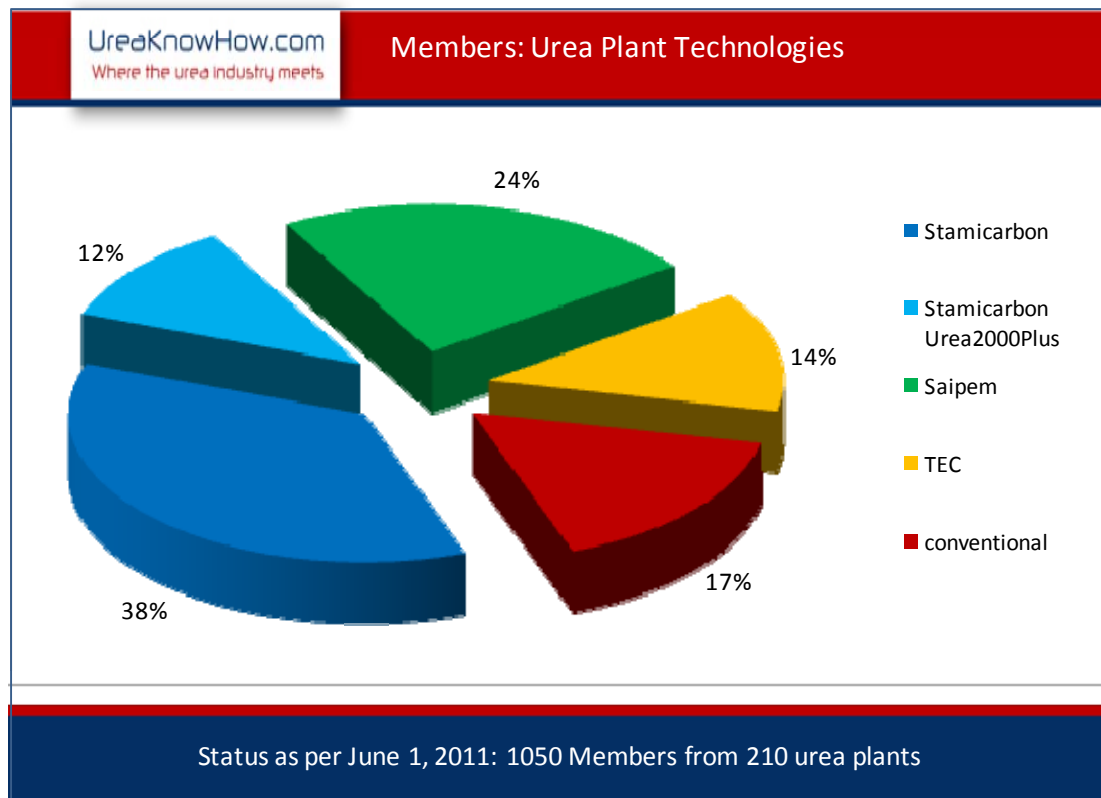

Figure 3: The technology of our Members Urea Plants

About 50% of our members work in Stamicarbon CO₂ stripping urea plants of which about 10% Urea2000Plus™ Pool Condenser or Pool Reactor technology plants. About 25% work in Saipem (Snamprogetti) NH₃ stripping plants and another 20% conventional urea plants. Finally about 15% or our Members work in TEC technology urea plants.

Further for your information: Some 75% of our Members are engineers while some 25% are managers and again 75% are process/chemical engineers while some 20% are mechanical/inspection engineers and some 5% electrical/instrumentation and other disciplines.
