

TUBACEX Urea Grades: A Success Story

TUBACEX has a long and successful history in providing urea grade stainless steels to the urea industry. Already since the late 1960's TUBACEX has supplied the tubes and internals for hundreds of heat exchangers in the urea industry. These can be strippers, carbamate condensers, scrubbers, medium pressure decomposers from the various urea process technologies. Also for nitric acid and melamine plants TUBACEX has been supplying corrosion resistant stainless steels. Now TUBACEX has also available a urea grade super-duplex to further improve the reliability of urea plants worldwide.

TUBACEX is a multinational group founded in 1963 with its headquarters in Alava and a global leader in the manufacture of stainless steel and high-alloyed tubular products (tubes and accessories). It also offers a wide range of services such as the design of tailored solutions for new plants and maintenance operations. It has production plants in Spain, Austria, Italy, the United States, India and Thailand, worldwide service centres and sales offices in 38 countries. Assuring you the highest quality and full service close to you.
