**UreaKnowHow.com**  
Where the Urea industry meets

**UreaKnowHow Clinic - Monday 27 February 09:00 - 17:00:**  
Today's name of the game: Improve your competitive advantage

Today's urea prices have not been so low during the last decade. Urea producers need to improve their competitive advantage by reducing operational expenditure; increasing added value to their products and/or increasing on-stream times, in order to compete and survive against competition. The urea clinic focuses on exactly these important topics.

All urea melt and granulation licensors CASALE, GGT, NIIK, SAIPEM, STAMICARBON, TEC and UFT will be invited to present their latest innovations and revamp technologies.

Plus, UreaKnowHow.com will present their TOP 10 REVAMP TOOLS: the ten most interesting and most economical revamp technologies will be discussed in detail in this urea clinic.

Furthermore, the latest safety incidents will be shared and 'lessons to be learned' will be discussed.

**CRU's Nitrogen + Syngas** celebrates its **30th anniversary** year in **London from 27 February to 2 March 2017**. This is the premier gathering for the global nitrogen and syngas industries with **nearly 500 delegates already booked to attend** – [view the latest delegate list here](#).

**[Book your place today](#) to benefit from the above and these additional programme highlights:**

1. Comprehensive technical agenda with **48 technical papers** covering the full value chain
2. **High-level analysis** of key feedstock and market trends, from CRU's nitrogen team
3. **Network with 700+** of your peers during the conference, exhibition and anniversary party

View the [full programme here](#) or view the new, [Interactive Technical Programme Brochure](#) for 2017.

After record attendance of 700 professionals in Berlin in 2016, and a record number of submissions for the 2017 technical programme, **we expect the 30th anniversary year to be the biggest event yet**.

*Technical troubleshooting, solution finding, and problem solving in fertilizer plants is not complicated when you attend CRU's Nitrogen + Syngas*

— Alizera Orooji, Senior Process Engineer,  
Pardis Petrochemical Company
