

UreaKnowHow.com Clinic Nitrogen & Syngas Conference on 27 February 2017 in London

“A complete overview of all available urea revamp technologies”

For the seventh time UreaKnowHow.com did organize the Pre-Conference Urea Clinic during the CRU Nitrogen & Syngas Conference, this time on 27 February 2017 in London.

The theme of this year was: **“TODAY’S NAME OF THE GAME: IMPROVE YOUR COMPETITIVE ADVANTAGE”**

Today’s urea prices have not been so low during the last decade. Urea producers need to improve their competitive advantage by Reducing Operational Expenditures, Increasing Added Value to their products and/or Increasing On Stream Times in order to compete and survive against competition.

The major urea melt and granulation licensors **CASALE, GGT, NIIK, SAIPEM and STAMICARBON** present their latest innovations and revamp technologies providing together a complete and valuable overview of the latest revamp technologies available in the market. We will distribute the presentations to all Members of UreaKnowHow.com.

UreaKnowHow.com did present the **UREAKNOWHOW.COM TOP 10 REVAMP TOOLS**: The ten most interesting and most economical revamp technologies available today.

More than thirty participants were attending the Urea Clinic of which nine urea producers. It is quite unique and proven to be very valuable to learn in one day all the latest urea revamp technologies from all major urea melt and granulation licensors.

The **UreaKnowHow.com TOP 10 Revamp Tools 2017** was presented in detail and consists of:

- #10. Venturi Steam traps
- #9. SANDVIK PROCESS SYSTEMS Rotoformer and NIIK High Speed Drum Granulation
- #8. KAPP CO₂ Chiller
- #7. SAIPEM OmegaBond™ Stripper in Saipem plants
- #6. SOLEX Product Cooler
- #5. High Efficiency Reactor Trays
- #4. LESER Urea Synthesis Safety Valves
- #3. BADOTHERM Pressure and Level measurements
- #2. Medium Pressure Technology in Stamicarbon plants
- #1. Improve Your Safety Standards

The hand out of these innovative and interesting revamp tools will be distributed to all Members of UreaKnowHow.com.

Finally an important safety incident with sight glass was shared and the lessons learned was discussed in detail. This discussion will be included in the Urea Incident Database of UreaKnowHow.com.

To conclude the UreaKnowHow.com Clinic Nitrogen & Syngas Conference on 27 February 2017 in London was a very valuable meeting in a really pleasant atmosphere.

We look forward to welcome you also next year on February 26, 2018 in Goteborg, Sweden.
