OF THE HIGH-CAPACITY
CHINESE PLANTS RELIES
ON CASALE TECHNOLOGY
FOR AMMONIA SYNTHESIS

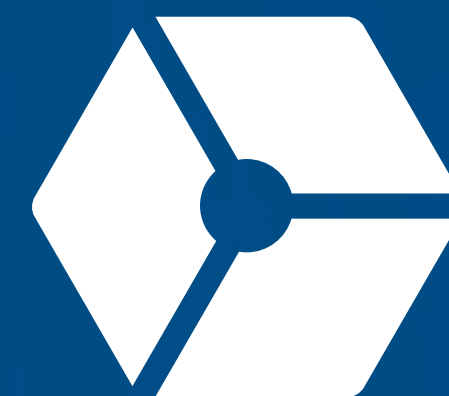

“Henan Xinlianxin Chemicals Group Co. Ltd, as one of Chinese benchmarking enterprises in energy consumption of ammonia production, **selected and used Casale’s ammonia process in three major production bases** in Henan Xinxiang, Jiangxi Jiujiang, Xinjiang.

All these plants achieved **excellent performance results**. Xinlianxin is looking forward to extending the cooperation with Casale in his future development”.

Mr Gu, Chief Engineer of Xinlianxin Group Co.

“We are very happy for the **continued cooperation** with one the leading Chinese fertilizer producers that **trusts our experienced know-how and reliable solutions** for ammonia synthesis.

This plant will also be the 10th largest in China, where Casale owns more than **77%** of the synthesis loops of new plants with a capacity exceeding 2000 MTD”.

Mr Federico Zardi, CEO of Casale
