

Who are our Members ?

Together with our Chinese website UreaNet.cn, our network consists of more than 14.000 Managers and Engineers representing All Nitrogen Fertilizer Plants in the world. We are the largest independent network in the nitrogen fertilizer industry and we keep growing.

Not only representatives from existing nitrogen fertilizer plants are Member but also representatives of plants planned and under construction have joined us as a Member. This means you will be able to contact directly managers and engineers of nitrogen fertilizer projects planned and under construction.

Find below more information about the background of our Members.

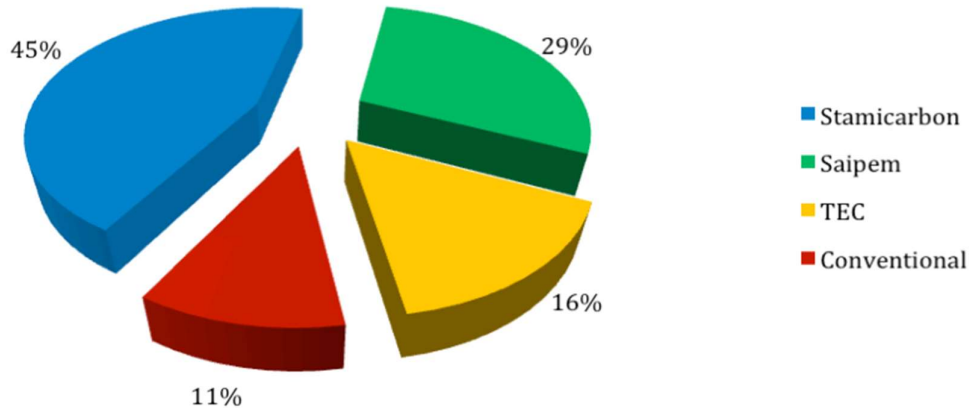

The figure above shows the location of the urea plants of our Members.

Bank address:
RABOBANK
Wim Duisenbergplantsoen 1
6221 SE, Maastricht
The Netherlands

BIC: RABONL2U
Account number: 1402.09.840
IBAN: NL07 RABO 0140 2098 40

UreaKnowHow.com B.V.
Chamber of Commerce: 52907090
VAT number: NL 850659024.B.01

About 45% of our Members are from Asia, China and Oceania and 20% from the Americas and Caribbean. Further about 20% are from Middle East and Africa and 15% from Europe, Russia and FSU countries.

The figure above shows what the synthesis urea technology is of the urea plants of our Members.

About 45% of our members work in STAMICARBON CO stripping urea plants of which about 10% PoolCondenser or PoolReactor technology plants. About 30% work in SAIPEM (Snamprogetti™) NH3 stripping plants and another 11% conventional urea plants.

About 15% of our Members work in TEC technology urea plants. Also CASALE has several grass root urea plants in operation and under construction.

Further some 75% of our Members are engineers while some 25% are managers. And 75% are process / chemical engineers while some 20% are mechanical / inspection engineers and some 5% electrical / instrumentation and other disciplines.

Although we call ourselves UreaKnowHow.com, many of our Members work in associated ammonia, nitric acid and ammonium nitrate plants. We closely co-operate with AmmoniaKnowHow.com and offer together a wide variety of products and services for any kind of nitrogen fertilizer plants.

Let us know when we can be of any support to you.
