UreaKnowHow.com 5-Day Urea Training

24-28 June 2024 in Amsterdam

Excellent feedback, also from Operators and Urea Newbies!

"I am relatively new to the urea process and was somewhat nervous about the class: It exceeded all of my expectations and consider it to be extremely valuable"

"In depth study on range of UREA issues"

"This course is extremely advisable not only for plant operators / managers, but also for engineers who have worked for years on urea process"

"A very useful event to learn and discuss on operational and maintenance topics for continuous improvement on safety and reliability in urea industry"

"You are the Best"

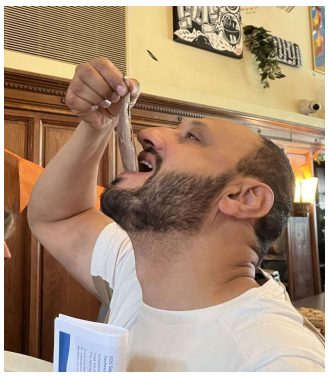
Some feedback statements from the nearly 40 participants during our latest 5-Day Urea Training Program from 24-28 June 2024 in Amsterdam. The participants joined from all around the world: Algeria, Austria, Egypt, Italy, Lybia, Netherlands, Oman, Switzerland and United States of America.

The positive feedback is first of all a result of the totally 150+ years practical experience of the trainers involved. Numerous cases were presented and discussed in detail, which was very much appreciated by the participants.

The training program provided an overview of the Urea Process Technologies, discussed Corrosion phenomena in urea plants, Materials of Construction, Thermodynamics and Phase diagrams, Operational aspects, Fluid Bed Granulation, Safety, Health & Environmental aspects, High Pressure Synthesis equipment, High Pressure Piping & Valves, Doing Repair, Corrosion Inspection Techniques and Inspection Program, CO2 Compressors design and operational issues, Revamp technologies and new innovations and numerous Troubleshoot and Corrosion / Reliability Cases.

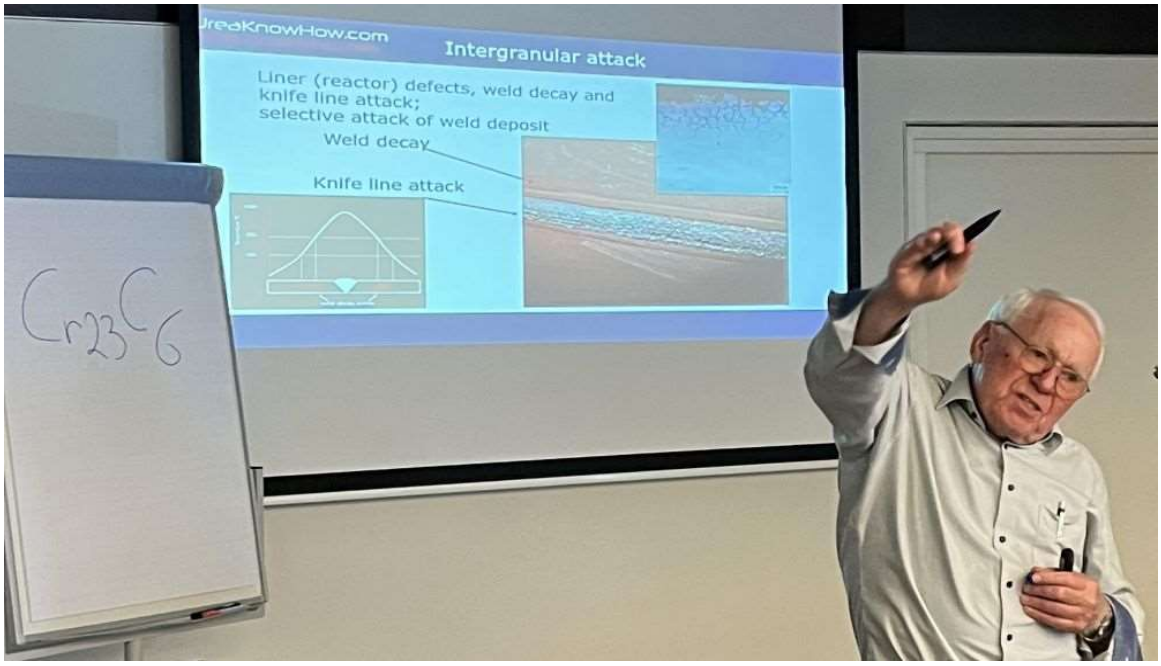
On Tuesday the Dutch soccer team was playing against Austria in the European Championship in Germany. And although everybody was wearing the orange cap, the Austrians won the game. Our two Austrian friends from Geroldinger has a very enjoyable evening…

On Thursday the UreaKnowHow.com Solution Provider Market was again a very lively event and valuable exchange between eight Solution Providers of UreaKnowHow.com and the participants. Present were BADOTHERM, CASALE, GEROLDINGER, KREBER, MAN, SAIPEM, SDS SEPARATION and STAMICARBON.



Also part of the training was to learn some of the typical Dutch culinary specialties like the Maatjes…and a boat tour through the canals of Amsterdam.

It was very to learn from the participating Operators and Urea Newbies their excellent feedback, which shows that our oldies with 150+ years experience are able to transfer their know how and experiences in a very effective and enthusiastic way 😊



Our next open 5-Day Urea Training is planned from 23-27 June 2025 in Amsterdam again!. But any time we can also organise one of our urea training programs at your site. Together with AmmoniaKnowHow.com and our latest Expert Kevin Rouwenhorst, we also organize electrolyser, PtX, ammonia and safety training programs.
